This document consists of **11** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Note: All Examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated. Nonetheless, the content must be clearly related to and derived from the passage.

Section A: Directed Writing

Question 1

This question tests the following writing assessment objectives (25 marks)

W1 articulate experience and express what is thought, felt and imagined
W2 organise and structure ideas and opinions for deliberate effect
W3 use a range of vocabulary and sentence structures appropriate to context
W4 use register appropriate to context
W5 make accurate use of spelling, punctuation and grammar

and reading assessment objectives (15 marks)

R1 demonstrate understanding of explicit meanings
R2 demonstrate understanding of implicit meanings and attitudes
R3 analyse, evaluate and develop facts, ideas and opinions, using appropriate support from the text
R5 select and use information for specific purposes.

Question	Answer	Marks
1	**Write a magazine article** for young people about how far they should keep up with the latest technologies. **In your article you should:** • **evaluate the views and attitudes people have towards new technology** • **give your own views, based on what you have read.** **Base your article on what you have read in <u>both</u> texts, but be careful to use your own words. Address both of the bullet points.** **Begin your article with a suitable headline.** **Write about 250 to 350 words.** <u>**Up to 15 marks are available for the content of your answer, and up to 25 marks for the quality of your writing.**</u> Notes on task: **Responses *might* use the following ideas:** **Text A** • scale of the IoT • privacy and security issues to date • benefit to consumers of IoT- taking over boring activities • global interest and investment – billions in revenue • slower take up of connected devices than expected • capacity of our things to 'judge' for us **Text B** • different reasons for adopting / buying new technology • some people like to be first / at leading edge • professional interest / industrial espionage • solves a problem / improves service • need to persuade some people / some people don't see need for / resist change • cost of change	

Question	Answer	Marks
1	**Possible evaluation of ideas:** **Text A** - technological developments are exciting but candidates may probe the pitfalls here - IoT investors may be attracted but they're missing what bothers consumers - IoT may limit consumer choice and agency - dangerous as encourages people not to think for themselves / lazy attitude/could cost jobs - how much real impact will these small jobs have? / could free up consumers' time for more important tasks/leisure - implies exploitation of consumers for profit - implies conflicting interests between companies and consumers, profit v safety - it's the consumer's responsibility to be vigilant about privacy - not possible to risk tech progress / pervasive / can't manage modern life without it **Text B** - tech companies exploit people/create a 'need' / encourage unhealthy obsession - consumers ill-judged to give up privacy for 'bragging rights' - tech industry not to be trusted – espionage accepted; need to be ahead of the game means ignoring privacy - if a product is working it is wasteful / environmentally unsustainable / immoral to replace it - but missed opportunities due to resistance to change may leave some people behind – no choice but to keep up - should be open to new ideas / do your own research/insist on better privacy before buying **Possible Synthesis of ideas:** Candidates may recognise the need and attractiveness of new tech, but advise caution / some scepticism. Could consider conflicting interests/exploitation but still want to keep up. IoT could be time-saving but at what expense? Wait and see approach may be better than progress at any cost
