This document consists of 12 printed pages.

1 All food on the Earth is made by plants.

For
Examiner's
1100

(a)	(i)	What is the name of the process by which plants make food?
		[1]
	(ii)	Complete this paragraph about the manufacture of food in plants.
		In order to make food, plants need water from the and
		from the atmosphere. The energy for the process
		is provided by from the sun. This is absorbed by the green pigment,
		[4]

**(b)** In many parts of the world, water for crop plants is in short supply. This problem can be reduced by irrigation.

The photographs show two methods used for the irrigation of crops.

#### **Method A**

### Method B

	[1]
(ii)	One of these methods is a strategy for water use in sustainable agriculture. What is meant by sustainable agriculture?
	[1]
(iii)	Which method, ${\bf A}$ or ${\bf B}$ , is more sustainable? Explain your answer by referring to both methods.
	[3]

2	Lan	d is ι	used in different ways by nomadic pastoralists, hunter-gatherers and crop farmers.
	(a)	(i)	Which of these has been in existence for longest?
			[1]
		(ii)	What is a nomadic pastoralist?
			[2]
	(b)		d is also used for tourism. This can damage the land so strategies are needed to uce this problem.
		(i)	Ecotourism is one way to manage this. What is ecotourism?
			[2]
		(ii)	Another way to manage tourism is to set up National Parks for the big game animals. In Kenya, however, this leads to conflict between nomadic pastoralists and conservationists. Explain the conflict.
			[3]
		(iii)	A third use of land is mining which also causes damage. After mining has finished
		(,	explain how this damage might be reversed.
			[2]

3 The diagram shows the water cycle.

For Examiner's Use

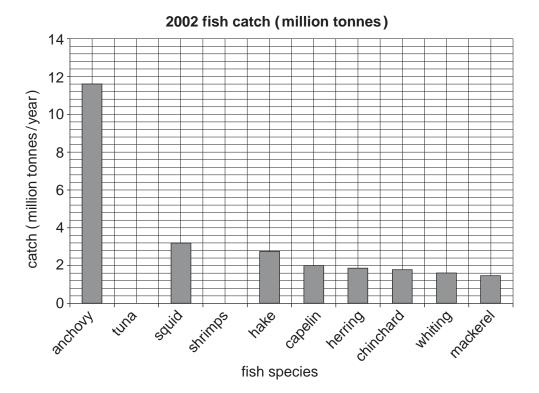

**(b)** As well as providing water for drinking and other uses, the oceans also provide humans with food, 82.6 million tonnes of fish were caught from the sea in 2002. The top ten species caught in 2002 are shown in the table below.

[1]

[1]

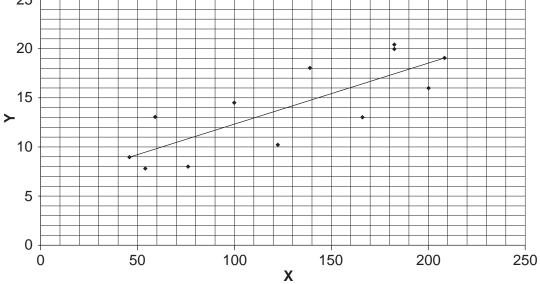

species	2002 catch (million tonnes)
anchovy	11.6
tuna	3.5
squid	3.2
shrimps	3.0
hake	2.7
capelin	2.0
herring	1.9
chinchard	1.8
whiting	1.6
mackerel	1.5
total of top ten species	

- (i) Complete the table by filling in the total catch for the top ten species.
- (ii) Complete the graph using figures from the table.

(111)	tonnes. What factors may account for this difference?	For Examiner's Use
	[3]	1

			8
4	(a)	Two hou	elements of the weather measured by meteorologists are temperature and sunshine irs.
		(i)	Name the instrument used to measure temperature and describe where it should be placed to obtain correct readings.
			[2]
		(ii)	Explain how sunshine hours are measured.
			[2]
	(b)	Loo	k at the graph.
			Relationship between hours of sunshine per month and average monthly temperature for a UK city over a year
		25	

(i)	Supply a	suitable	title for	the X	axis and	suitable	units f	or the	Υ	axis.
-----	----------	----------	-----------	-------	----------	----------	---------	--------	---	-------

X axis title.....

Y axis units

For Examiner's Use	and a such language and a Military of a successful and a such different such diff	(ii)	
	[1]		
	Name the instrument that could be used to help to decide whether an area would be suitable for generating electricity from wind.	(i)	c)
	[1]		
	State <b>two</b> environmental problems that might be caused by the use of wind power.	(ii)	
	[0]		

		ans cover 70 percent of the Earth's surface and contain 97 percent of its water. They important resource potential for humans.
(a)	Sta	te <b>two</b> ways in which humans can use the ocean's resources.
	•••••	
		ici
		[2]
(b)	(i)	How might the extraction of oil from under the sea lead to pollution and what are the effects of the pollution?
		[3]
	(ii)	How might this pollution be controlled?
	` ,	
		[1]
(c)	Sev	vage also causes marine pollution.
. ,		
	(i)	How does sewage get into the sea from towns inland?
		[1]
	(ii)	Describe the effects of sewage in the sea.
		[3]
