

**MARK SCHEME for the October/November 2011 question paper  
for the guidance of teachers**

**0460 GEOGRAPHY**

**0460/23**

Paper 2, maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes must be read in conjunction with the question papers and the report on the examination.

- Cambridge will not enter into discussions or correspondence in connection with these mark schemes.

Cambridge is publishing the mark schemes for the October/November 2011 question papers for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level syllabuses and some Ordinary Level syllabuses.

|        |                                |          |  |
|--------|--------------------------------|----------|--|
| Page 2 | Mark Scheme: Teachers' version | Syllabus |  |
|        | IGCSE – October/November 2011  | 0460     |  |

- 1 (a) (i) Fayd' herbe, [1]  
(ii) CWA/Filter, [1]  
(iii) tea, [1]  
(iv) other, [1]  
(v) riverine trees, [1]  
Mark the first feature given. [1]

- (b) coral/reef, [5]  
headland/point (extract from names but pte =0),  
bay,  
river mouth/estuary,  
sand/mud/beach,  
rock/cliff,  
filaos/casuarina,  
scrub/scattered trees,

- (c) streams/small rivers/small watercourse, [3]  
waterfall/cascade,  
lake/pond/widened course, (reservoir = 0)  
meanders,  
(mainly) flow south west/south,  
tributaries,  
higher density in north/south/lower density in centre,

- (d) (i) bench mark: 52/53 (metres) [1]  
difference in height: 12/13 (metres),  
Both needed. [1]  
(ii) 1750 [1]  
(iii) 1 in 135,

Carry errors forward using the ECF symbol as follows:  
If the correct height difference and an incorrect choice of distance from (d)(ii) have been used, 1 in 135 is also the correct answer.  
If an incorrect height difference has been used, calculate the answer using the candidate's figures from (d)(i) and (d)(ii). The circled answer must be the closest to this. [1]

|        | IGCSE – October/November 2011  | 0460     |

- (e) main road junction/B road junction/route centre,  
 (relatively) gentle slope/flat qualified (flat = 0),  
 sugar plantations/sugar fields,  
 mill/sugar factory,  
 dry site/unlikely to flood,  
 pits,  
 school, )  
 post office, ) 2 services = 1 mark  
 community centre, ) max 2 marks  
 police station, )  
 mosque/temple/church, )  
 many services = 1 within max 2 for services, [4]

- 2 (a) (i) commercial/Central Business District/CBD, [1]
- (ii) tall buildings/multi-storey/skyscrapers,  
 (fairly) high density of buildings,  
 tall/high density because high land values/lack of space,  
 next to/behind dock area/port facilities (on map),  
 glass/steel buildings,  
 If choose high density residential in (i) = 0 but allow relevant description in (ii). [3]

- (b) (i) natural harbour/sheltered,  
 (sheltered by) island/headland/peninsula,  
 large area of water/large natural harbour/room for many ships,  
 large/long waterfront,  
 junction of roads/route centre, [2]
- (ii) near the CBD/commercial zone,  
 central location for residents,  
 large area of land,  
 road access,  
 open space for expansion, [1]
- (iii) near residential areas so noise problem,  
 flight path over residential areas, [1]

- 3 (a) (i) it has risen, [1]
- (ii) about half/just less than half/48–49%/27 000 out of 55 000 etc., [1]
- (iii) 2003, [1]
- (iv) 27 000, [1]

|        |                                |          |
|--------|--------------------------------|----------|
| Page 4 | Mark Scheme: Teachers' version | Syllabus |
|        | IGCSE – October/November 2011  | 0460     |

- (b) cotton is grown nearby/on the Deccan Plateau,  
fast flowing rivers for HEP,  
SW winds/winds from the sea (in summer) provide a humid atmosphere/humidity,  
a large labour force in Mumbai,  
a large market in Mumbai,  
Mumbai is a port for export to markets,

Note that the numbers are to help the candidates. Ignore them when marking: e.g. two advantages could be credited under one number. [4]

- 4 (a) (i) 1400, [1]
- (ii) plot at the intersection of the lines for 7.2 and 800,  
(accept if shown as a cross) [1]
- (iii) accept any sensible way of explaining the problem e.g.  
the figures are too large for the scale,  
if the scale was smaller the smaller values would not be shown well,  
won't fit on page, [1]
- (iv) no relationship, [1]
- (b) (i) 7.2, [1]
- (ii) 1, [1]
- (iii) 1930/31 to 52/53, [1]
- (iv) 1900–1910, [1]
- 5 (a) dense,  
canopy,  
green,  
abundant foliage,  
bushes/shrubs (by the water),  
trees further back are taller/trees in foreground are shorter/ emergents are taller,  
varied heights/layers,  
thin trunks/thin trees,  
straight trunks,  
growing in water/mangroves,  
different shapes/different species, [4]
- (b) (i) accept within the range 25.5 to 26.5, [1]
- (ii) 50, [1]
- (iii) hot all year/high temperatures all year,  
rainfall exceeds evaporation all year/rainfall all year/wet all year, [2]

|        |                                |          |  |

|        | IGCSE – October/November 2011  | 0460     |  |

- 6 (a) (i) by sea/boat/air, (not cruise ship)  
(ii) isolated/at end of a peninsula/inaccessible/remote,  
(iii) SE/SSE, [1]

- (b) Description:  
very large/very rapid increase overall,  
no increase at start,  
early slight/slow increase, ) exponential increase = 2  
later rapid increase, )
- Explanation:  
because of road/highway to USA,  
because of the expansion of the airport/international flights, [5]
