

## Cambridge O Level

---

**BUSINESS STUDIES**

**7115/22**

Paper 2 Case Study

**October/November 2021**

MARK SCHEME

Maximum Mark: 80

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2021 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

---

This document consists of **19** printed pages.

**Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**Social Science-Specific Marking Principles  
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require  $n$  reasons (e.g. State two reasons ...).
- d DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

**2 Presentation of mark scheme:**

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

**3 Calculation questions:**

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

**4 Annotation:**

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

Question	Answer	Marks
1(a)	<p><b>Explain <u>two</u> reasons why PPE may remain small.</b></p> <p>Award 1 mark for a suitable reason (maximum of 2 marks).</p> <p>Award a maximum of 3 additional marks for <b>each</b> explanation of why PPE may remain small – <b>one of which must be applied to this context.</b></p> <p>Suitable reasons might include:</p> <ul style="list-style-type: none"> <li>• The product is specialised – produced using job production / not suitable to be produced on a large scale – customer preference would be lost / designed to needs of customer</li> <li>• Market size - doesn't have a large market / sales are low - output therefore on a small scale</li> <li>• Owner's objectives / owner's preference / owner wants the business to remain small – to keep a work life balance</li> <li>• Easier to manage / control - may not want the stress / does not have the personal skills to manage a larger business - keeps closer links with employees and customers</li> <li>• Lack of finance / fewer finance options for a sole trader</li> </ul> <p>For example: The product is specialised and not produced on a large scale (1) as each piece of playground equipment is made to order (app) so cannot be mass-produced. (1) Therefore, the business is likely to remain small as it will produce a limited number of pieces of play equipment when they are ordered. (1)</p> <p><b>Application</b> could include: wooden playground equipment; children's playgrounds; sole trader; job production; individually designed playground equipment; 3 skilled workers; crowd-funding; cost-plus pricing; fully tested to meet legal safety standards; parents want to have playground equipment at home; wants to spend time with her children; 2 children; high-quality equipment.</p>	8

Question	Answer	Marks															
1(b)	<p><b>Consider the advantages and disadvantages of <u>two</u> suitable types of business organisation for PPE. Which do you think is the best one if PPE grows? Question	Answer	Marks
3(a)	<p><b>Explain <u>one</u> cost and <u>one</u> benefit for PPE of developing a new product.</b></p> <p>Award one mark for a cost/benefit (maximum of 2 marks).</p> <p>Award a maximum of 3 additional marks for <b>each explanation</b> of the cost/benefit of developing new products – <b>one of which must be applied to this context.</b></p> <p>Costs might include:</p> <ul style="list-style-type: none"> <li>• Costs of carrying out market research - to research the target market - to identify the size of the potential sales</li> <li>• Costs of product development / producing trial products - produce prototype - cost of materials and components for trial products / time-consuming</li> <li>• Risk of failure of the business if the product is unsuccessful – due to lack of sales giving no revenue</li> <li>• May damage image of the business and other brands if product is unsuccessful</li> </ul> <p>Benefits might include:</p> <ul style="list-style-type: none"> <li>• Unique Selling Point [USP] may give business a competitive advantage – consumers may think the business produces up-to-date products – making them more popular than competitors that are seen as old fashioned</li> <li>• The business will have a more diversified range of products – spreads risk – reduces chances of business failure if one product fails</li> <li>• May attract more customers – increase sales</li> <li>• Business may expand into new markets - increases sales</li> <li>• Business may expand in existing markets</li> </ul> <p>For example: There may be high costs of carrying out market research (1) to find out what customers want from a new product. (1) This is needed when developing a new piece of playground equipment (app) to ensure it will be attractive to children and therefore be more likely to sell. (1)</p> <p><b>Application</b> could include: wooden playground equipment; children’s playgrounds; sole trader; job production; individually designed playground equipment; 3 skilled workers; cost-plus pricing; fully tested to meet legal safety standards; parents want to have playground equipment at home; many competitors; no other similar products in the market.</p>	8

Question	Answer	Marks

Question	Answer	Marks									
3(b)	<p>Relevant points might include:</p> <table border="1" data-bbox="304 315 1326 1568"> <thead> <tr> <th data-bbox="304 315 571 376"></th> <th data-bbox="571 315 948 376">Advantages</th> <th data-bbox="948 315 1326 376">Disadvantages</th> </tr> </thead> <tbody> <tr> <td data-bbox="304 376 571 1160">Cost-plus</td> <td data-bbox="571 376 948 1160"> <ul style="list-style-type: none"> <li>• Easy to apply to <b>individually produced playground equipment</b></li> <li>• Can have different mark-up in different markets</li> <li>• Each product makes a profit for the business</li> </ul> </td> <td data-bbox="948 376 1326 1160"> <ul style="list-style-type: none"> <li>• The costs of producing the new product may be high and so the price of the final product may be too high to be competitive – loses customers – <b>as there are many competitors</b></li> <li>• Profit will only be made if sufficient <b>playground toys</b> are sold to break-even</li> <li>• May not give the brand image of the <b>high-quality product</b></li> <li>• Time is taken to research and calculate cost prices</li> <li>• No incentive to reduce costs</li> </ul> </td> </tr> <tr> <td data-bbox="304 1160 571 1568">Penetration pricing</td> <td data-bbox="571 1160 948 1568"> <ul style="list-style-type: none"> <li>• Low price attracts customers and increases sales of <b>playground equipment</b></li> <li>• Helps to ensure a successful launch into a new market</li> <li>• Quickly builds market share</li> </ul> </td> <td data-bbox="948 1160 1326 1568"> <ul style="list-style-type: none"> <li>• Low price will mean low profit per unit</li> <li>• Customer may expect prices to remain low and therefore not purchase the <b>toys</b> when the price is raised at a later date</li> <li>• Consumer may think low price is due to low-quality product</li> </ul> </td> </tr> </tbody> </table>		Advantages	Disadvantages	Cost-plus	<ul style="list-style-type: none"> <li>• Easy to apply to <b>individually produced playground equipment</b></li> <li>• Can have different mark-up in different markets</li> <li>• Each product makes a profit for the business</li> </ul>	<ul style="list-style-type: none"> <li>• The costs of producing the new product may be high and so the price of the final product may be too high to be competitive – loses customers – <b>as there are many competitors</b></li> <li>• Profit will only be made if sufficient <b>playground toys</b> are sold to break-even</li> <li>• May not give the brand image of the <b>high-quality product</b></li> <li>• Time is taken to research and calculate cost prices</li> <li>• No incentive to reduce costs</li> </ul>	Penetration pricing	<ul style="list-style-type: none"> <li>• Low price attracts customers and increases sales of <b>playground equipment</b></li> <li>• Helps to ensure a successful launch into a new market</li> <li>• Quickly builds market share</li> </ul>	<ul style="list-style-type: none"> <li>• Low price will mean low profit per unit</li> <li>• Customer may expect prices to remain low and therefore not purchase the <b>toys</b> when the price is raised at a later date</li> <li>• Consumer may think low price is due to low-quality product</li> </ul>	
	Advantages	Disadvantages									
Cost-plus	<ul style="list-style-type: none"> <li>• Easy to apply to <b>individually produced playground equipment</b></li> <li>• Can have different mark-up in different markets</li> <li>• Each product makes a profit for the business</li> </ul>	<ul style="list-style-type: none"> <li>• The costs of producing the new product may be high and so the price of the final product may be too high to be competitive – loses customers – <b>as there are many competitors</b></li> <li>• Profit will only be made if sufficient <b>playground toys</b> are sold to break-even</li> <li>• May not give the brand image of the <b>high-quality product</b></li> <li>• Time is taken to research and calculate cost prices</li> <li>• No incentive to reduce costs</li> </ul>									
Penetration pricing	<ul style="list-style-type: none"> <li>• Low price attracts customers and increases sales of <b>playground equipment</b></li> <li>• Helps to ensure a successful launch into a new market</li> <li>• Quickly builds market share</li> </ul>	<ul style="list-style-type: none"> <li>• Low price will mean low profit per unit</li> <li>• Customer may expect prices to remain low and therefore not purchase the <b>toys</b> when the price is raised at a later date</li> <li>• Consumer may think low price is due to low-quality product</li> </ul>									

Question	Answer			Marks
3(b)		Advantages	Disadvantages	
	Skimming	<ul style="list-style-type: none"> <li>• Customer may think the <b>playground equipment</b> is of high quality</li> <li>• High research and development costs will quickly be recovered</li> <li>• <b>The product is new and unique on the market</b>, then high prices may be paid by customers leading to high profits before competitors produce a similar product</li> </ul>	<ul style="list-style-type: none"> <li>• High price may put off potential customers</li> <li>• The high price and possible high profit per item of <b>playground equipment</b> may encourage competitors to quickly enter the market taking away its advantage of being first with the new product</li> </ul>	
	Recommendation	<ul style="list-style-type: none"> <li>• Cost-plus pricing as the product <b>is new so there are no other competitors</b> to compare prices and at least this ensures that a profit is made per unit sold. Price skimming may be too high an initial price and therefore there would be low sales and penetration pricing may not result in any profit if too low.</li> <li>• As the product is new then penetration pricing might be the best one to choose to get the <b>playground equipment</b> established in the market. There are other playground products being sold and so it will get this product well known.</li> <li>• Skimming because Kaari wants to create an image of high quality for the <b>new playground toy</b> and this is emphasised in the advertisement in Appendix 1.</li> </ul>		

Question	Answer	Marks
4(a)	<p><b>Explain <u>four</u> functions of management carried out by Kaari.</b></p> <p>Award one mark for each function named (maximum of 4 marks).</p> <p>Award a maximum of 1 additional mark for <b>each explanation in context</b> of the function of management that may be carried out by Kaari.</p> <p>Functions might include:</p> <ul style="list-style-type: none"> <li>• Planning - setting aims for the business such as sales targets of increasing output of <b>3 large items of playground equipment</b> per week</li> <li>• Organising - Kaari organises the tasks for the <b>3 employees</b></li> <li>• Coordinating – the tasks for the <b>job production</b></li> <li>• Commanding - Kaari instructs the employees on how to manufacture <b>the new unique product</b></li> <li>• Controlling - Kaari controls the employees so that <b>15 small items of playground equipment for home use</b> is produced each week.</li> </ul> <p>For example: Organising (1) the employees to manufacture the playground equipment (app)</p> <p><b>Application</b> could include: wooden playground equipment; children’s playgrounds; 3 large/15 small items of playground equipment; high-quality equipment; sole trader; job production; individually designed playground equipment; 3 skilled workers; cost-plus pricing; fully tested to meet legal safety standards; playground equipment for home use.</p>	8
