ENVIRONMENTAL MANAGEMENT

5014/11

Paper 1

October/November 2010

2 hours 15 minutes

Candidates answer on the Question Paper.

Additional Materials:

Ruler

Protractor

READ THESE INSTRUCTIONS FIRST

Write your Centre number, candidate number and name on all the work you hand in.

Write in dark blue or black pen.

You may use a soft pencil for any diagrams, graphs or rough working.

Do not use staples, paper clips, highlighters, glue or correction fluid.

DO **NOT** WRITE IN ANY BARCODES.

Answer all questions.

All questions in Section A carry 10 marks.

Both questions in Section B carry 40 marks.

At the end of the examination, fasten all your work securely together.

The number of marks is given in brackets [] at the end of each question or part question.

For Examiner's Use

[Turn over

Section A

For Examiner's Use

1 (a) Look at the photograph, which shows part of the largest copper mine in the world, located in the Rocky Mountains, USA.

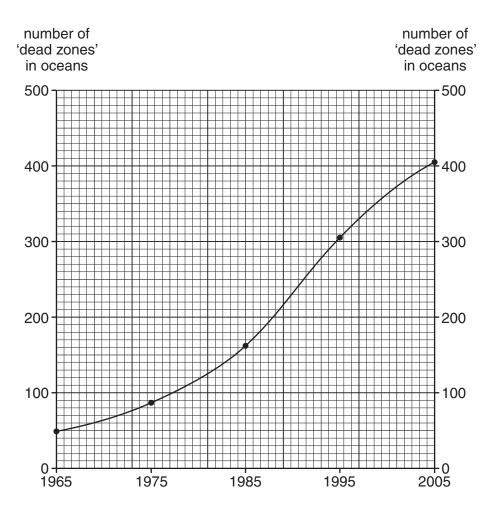

Use evidence from the photograph to describe the mining method shown.
[4]

	(ii)	The ore from the mine contains only 1% copper. What problems will result from this?	For Examiner Use
		[3]	
(b)		at do you think should be done with such a large hole after mining has finished? e reasons for your answer.	
		[3]	

2 (a) Look at the graph showing changes in the number of 'dead zones' in the oceans. A 'dead zone' is found in very shallow, coastal waters. These areas used to have healthy ecosystems, but not much life can now survive in them.

For Examiner's Use

(i) How many dead zones were known in 1965 and 2005?

1965 2005 [2]

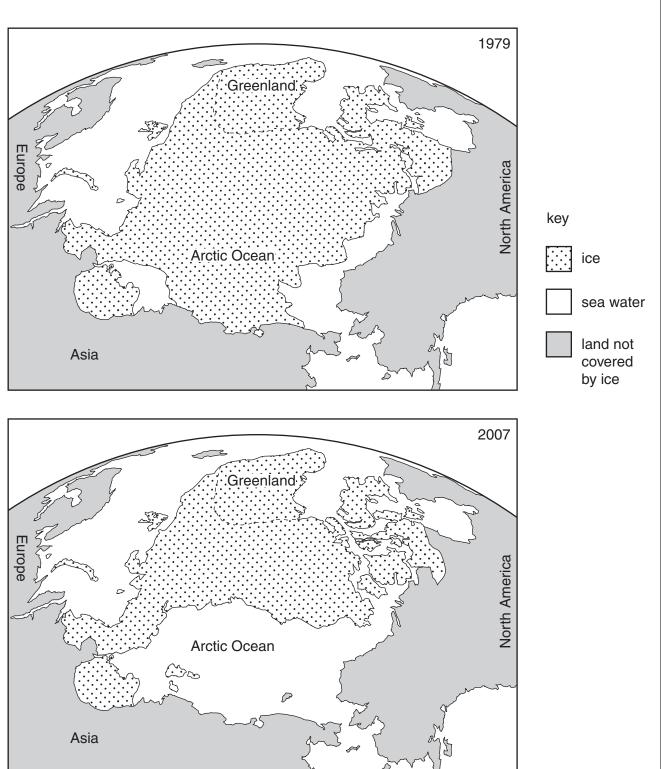

(ii) Which ten-year period had the largest increase in 'dead zones'?

.....[1]

(b)	(i)	Name two heavy metals.	Fo Exami
	(ii)	Explain how heavy metals and plastics can cause the death of marine animals.	
			[3]
(c)	Wh	y is it difficult to prevent the formation of 'dead zones'?	
		ŗ	.01

3 Look at the maps showing the extent of ice cover north of the tundra zone in September 1979 and September 2007.

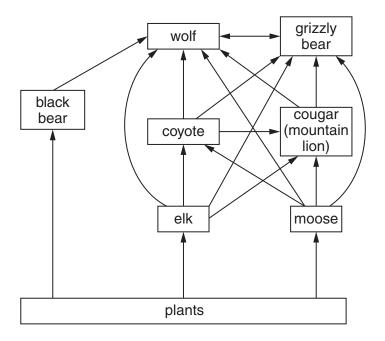

For Examiner's Use

(a)	(i)	Describe one main similarity and one main difference in the extent of the ice cover in 2007 compared with 1979.	For Examiner's Use
		similarity	
		difference [2]	
	(ii)	On the 2007 map write ' T ' to show a land area with a tundra climate. [1]	
(b)	Des	scribe and explain:	
	(i)	the effect of snow and ice on the incoming rays from the Sun,	
		[2]	
	(ii)	why insolation is low in high latitudes.	
		[2]	
(c)		the changes in ice cover shown on the maps be linked to climate change? should give reasons for agreeing or disagreeing, or both.	
		[3]	

4 (a) Look at the diagram, which shows part of the food web in Yellowstone National Park, USA.

For Examiner's Use

Many wolves once lived in Yellowstone National Park but there were none living there by the 1970s. Wolves from Canada have recently been released in the area.

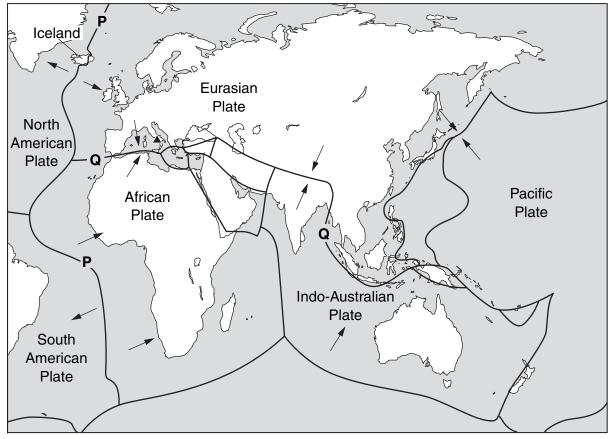

(i)	What is likely to happen to the wolf population over time?
	[1]
(ii)	Which animal can help to control the population of wolves?
	[1]
(iii)	How many feeding (trophic) levels are shown?
	[1]
(iv)	Use an example from the food web diagram to explain the meaning of the following terms:
	predator
	competition
	producer
	food chain
	[4]

(b)	Fires which start naturally in Yellowstone National Park are allowed to burn.	For
	Explain the likely effects of this policy on animals in any ecosystem.	Examiner Use
	[3]	

Section B

For Examiner's Use

5 (a) Look at the map which shows major plate boundaries in Europe, Africa and Asia.

Key:

- --- Plate boundaries
- Direction of plate movement
 - Volcano Vesuvius

i) State the direction of plate movement along the boundary marked P .
[1]
i) Name the type of plate boundary at P .
[1]
i) Volcanic eruptions are frequent in Iceland. Explain why.
[2

(iv)	A high percentage of Iceland's energy needs come from renewable alternative sources. Describe how volcanic activity can be harnessed for electric power and heating.	For Examiner's Use
	[3]	
(v)	The earthquake risk is high in countries located along plate boundary Q . Explain why earthquakes often occur along plate boundaries of this type.	
	[4]	

(b)	Gov	ernments of countries with a high earthquake risk can prepare for future earthquakes.	For Examiner's
	Des	cribe strategies they can use that will help to	Use
	(i)	stop buildings from collapsing in an earthquake,	
	(ii)	reduce the number of deaths after the earthquake.	
		[5]	

(c) Look at the table which shows strong earthquakes along plate boundary **Q** during the nine years between 2000 and 2008.

For Examiner's Use

Strong earthquakes above 6.0 on the Richter Scale along plate boundary Q (2000–2008)

	Date	Richter scale	Location	Estimated deaths
2000	_			
2001	January	7.9	Gujarat, India	20,000
2002	_			
2003	May	7.0	Algeria	2,000
	December	6.5	Bam, Iran	30,000
2004	December	8.9	Off the coast of Indonesia	250,000
2005	February	6.4	Kerman, Iran	300
	March	8.7	Off the coast of Indonesia	1,300
	October	7.6	Northern Pakistan and Kashmir	79,000
2006	April	6.0	Western Iran	70
	May	6.2	Yogyakarta, Indonesia	5,000
2007	_			
2008	October	6.5	Baluchistan, Pakistan	300

(1)	instead of just 'Deaths'?
	[2]
(ii)	Name the two countries with the largest number of strong earthquakes during these nine years.
	[1]
(iii)	Describe the pattern of strong earthquakes during the nine years shown in the table.
	[2]

(iv)	What does the information in the table suggest about the chances of people predicting when and where earthquakes will occur along plate boundary ${\bf Q}$?	For Examiner's Use
	[2]	
(v)	'The stronger the earthquake, the greater the number of deaths.' Describe evidence in the table for and against this statement.	
	[4]	
(vi)	In your view, how strong is the evidence for this statement? Explain your answer.	
	[0]	

For Examiner's Use

• eruption and date

(i)	Describe differences in the pattern of eruptions between the nineteenth (1800–1900) and twentieth centuries (1900–2000).
	[2]
(ii)	More than half a million people live in the area around Vesuvius. It is the most densely populated part of southern Italy. State the most likely reason why so many people live near this volcano.
	State the most likely reason why so many people live hear this voicano.

(iii) Scientists keep a close watch on Vesuvius in the hope of predicting the next eruption and warning people before it happens. Four ways scientists watch and study volcanoes are given in the spider diagram below.

For Examiner's Use

thermometers – to measure temperatures in the crater		seismographs – to record small earthquake shocks
	watching and studying volcanoes	
observations – of		tilt meters – to
emissions of gas		record small changes in
and steam		ground shape
Describe how these way	ys are useful for predict	ing the next volcanic eruption.
		[3]
(iv) Suggest why the scient volcanic eruptions.	ntists might not alway	s make correct predictions about
		[2]

For Examiner Use	when scientists predict that Vesuvius is about to erupt again, more than half a million people will need to be evacuated from their homes. How easy or difficult will it be to put this strategy into action? Answer as fully as you can.
	[3]
	[Total: 40 marks]

6 (a) The table below shows the composition of the lower atmosphere.

gas	percentage
nitrogen	78%
oxygen	21%
other gases	1%

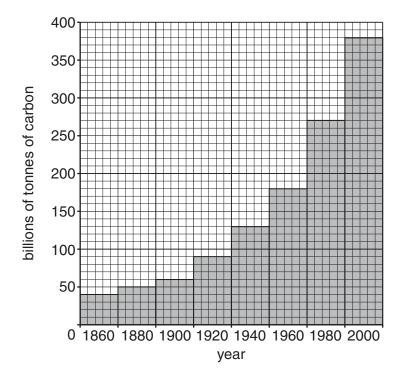

For Examiner's Use

	otilei gases		I /0			
(i)	In the frame below, draw a divided I complete the key.	oar graph	to show	these perc	entages	and
)	percentage		100	key: nitroge oxyger other o	า	
(ii)	Among the other gases are water vapor Explain the importance of each of these					[3]
	Water vapour					
	Carbon dioxide					
	Odrbon dioxido					•••••
			•••••		•••••	
	Ozone					
						[6]
(iii)	How is the natural balance of the gamaintained in the atmosphere?	ases, nitro	gen, oxyç	gen and ca	rbon diox	(ide,
						[0]

(b) Some human actions are disrupting this natural balance.

The graph below shows total world carbon emissions since 1860.

(i) On the graph, draw a summary line to show the change between 1860 and 2000. [1]

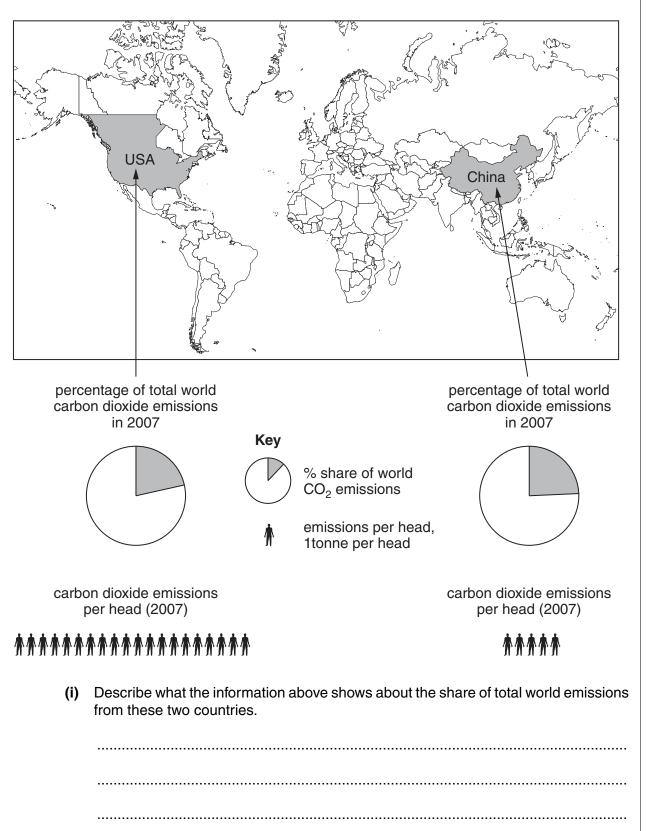

Describe the trends shown before and after 1960 and quote values to support your

	answer.
	[3]
(iii)	Explain why many people believe that increased emissions of carbon dioxide are causing global warming.

(ii)

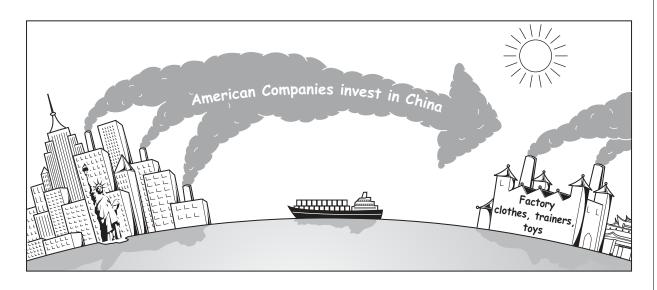

(c) Information about the two countries in the world with the greatest carbon dioxide emissions in 2007 is given below.

For Examiner's Use

(ii) The cartoon below is trying to explain why carbon dioxide emissions are increasing so fast in China.

For Examiner's Use

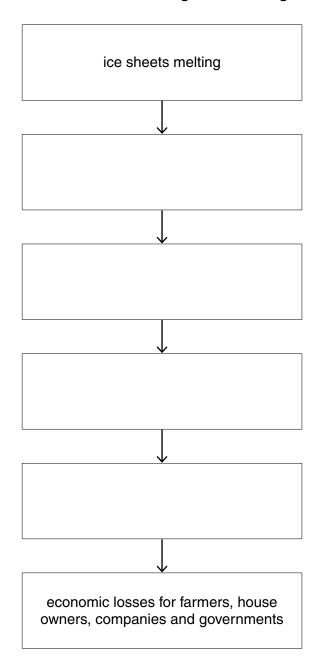

Explain what the cartoon shows about the reasons for carbon dioxide emisincreasing in China.	

(d) When complete, the flow diagram below will show the worldwide effects of global warming.

For Examiner's Use

worldwide effects of global warming

Fill in the boxes by choosing the best comment for each box from the list below.

- * sea defences breached
- * previously populated areas abandoned
- * rising sea levels
- * flooding of low lying coastal areas such as deltas

[3]

(e) In November 2008 the new President in the Maldives said that he intended to set up a wealth fund from tourist income. This fund would be used to buy land in another country where his people could move, should global warming be worse than expected. Global sea levels are expected to rise 25–58 cm by 2100.

The Maldives

For Examiner's Use

Read the information about the Maldives.

• 380,000

Population

		• capital city Malé 100,000	
Ge	ography	 coral islands in the middle of the Indian Ocean about 1200 islands, of which about 250 are populated highest point 2.4 m above sea level; average 1.5 m 	
Eco	onomy	 main income from tourism with about 500,000 visitors a year average income about US\$4,600 per head 	
(i)		why the President of the Maldives is more worried than leaders untries about possible threats from global warming.	in most
			[2]
(ii)	our own	sident of the Maldives said 'We can do nothing to stop climate ch .' e is this statement? Explain your answer.	ange on
			[2]
(iii)		esident plans to buy land in another country for his people to go se. Describe one likely problem with this plan.	to if sea
			[2]

(f) Read the information below.

For Examiner's Use

2008 - a bad year for climatic hazards

- millions face drought in Ethiopia
- 11 million affected by monsoon floods in India
- 128,000 killed by a cyclone that struck Myanmar (Burma)

A ... 'I blame climate change for all these disasters' **B** ... 'these are just normal climate events'

C ... 'large numbers are affected because of poverty'

(i)	Explain the viewpoints of persons B and C .
	[4]
(ii)	How far do you agree with person A? Explain your answer.
	[0]
	[2]
